ABSTRACT

The thesaurus is intended as a preliminary standardization and clarification of terms used to index special education instructional materials throughout the Special Education Instructional Materials Centers/Regional Media Centers (IMC/RMC) Network. The majority of entries are approved descriptors appearing in the selected standard, the Thesaurus of ERIC Descriptors. Other entries are identified as terms which are not approved descriptors of the Educational Resources Information Center (ERIC) thesaurus but which represent concepts necessary to the indexing of instructional materials. Over 400 indexing terms are included. Related terms are cross referenced and selective usage notes are provided. (KW)

PREFACE REVISED FIRST EDITION

July, 1971

The Thesaurus for Special Education Instructional Materials represents an attempt to standardize and clarify terms used in indexing procedures throughout the Special Education IMC/RMC Network. The enclosed Thesaurus largely reflects a compilation of listings presently in existence at the University of Texas Special Education Instructional Materials Center at Austin, and the New York Regional Special Education Instructional Materials Center at Albany.

All unmarked terms are approved items which appear in the selected standard, the *Thesaurus of ERIC Descriptors*. Terms preceded by an asterisk represent descriptors which are not ERIC approved, but are necessary concepts to the indexing of instructional materials. Such terms are either to be used as identifiers, or contain information referring the user to an approved related descriptor. Identifiers can be added or removed according to the particular need of the individual SEIMC, and are often used to reflect geographic locations, proper names, tests, and other specific terms. Comparisons of descriptors have been made and, when feasible, Texas and New York terms have been translated into ERIC terms. The *Thesaurus for Special Education Instructional Materials* can be used in conjunction with the *Thesaurus for Exceptional Child Education*, which is a comparable listing of ERIC approved terms especially relevant to professional materials.

The value of any thesaurus rests in its ability to be flexible and to reflect new concepts and changing needs. The *Thesaurus for Special Education Instructional Materials* is not intended as the final, rigid word on index terminology; rather, it is hopefully to serve as the beginning structure for a uniform taxonomy for special education instructional materials. Suggestions of possible additions, deletions, or general improvement are welcomed in written form to the CEC Information Center on Exceptional Children.

We express our appreciation to the staffs at the Texas SEIMC and the New York SEIMC whose interest and efficiency resulted in this thesaurus.
